

CP Tech Center Webinar Program

Ideal for DOT, City/County, Consultants, and Contractors

All programs are at 12 Noon (Central)

OUR WEBINAR PROGRAM:

August 18th – Concrete Pavement Joint Design, Layout and Construction

Two industry experts, both with former DOT experience, share their insights, philosophies, and some important do's and don'ts in the art /science of joint design for concrete pavements. They will specifically focus on the more difficult jointing challenges for ramps, intersections and roundabouts. Additionally, each speaker will offer their perspective into proper training, support and assistance in their market areas.

Presenters: Kevin McMullen, P.E., President,
Wisconsin Concrete Pavement Association

Bill Cuerdon, Executive Director,
New York State Chapter
American Concrete Pavement Association.

September 22 - Resiliency/Resilient Pavement Systems

We hear the word resiliency, but how does it tie into pavements, and the environment – how do we recover from disasters and how can road design impact this?

Topics in this presentation include:

- The Need for Resilient Pavements
- Defining Resiliency
- Improving a Pavement's Resiliency

Presenters: Jim Mack Director Infrastructure - Market Development , CEMEX

Tom Van Dam, Principal, NCE

October 20 - Concrete Roundabout Design & Construction

Roundabouts are being used more often as a way to ensure safer driving as well manage multiple intersections. Roundabouts can be simple and straight forward, if you don't get turned around. Join us to learn more.

More details to follow

We provide our audience with technical / educational programs which include real world application experience. Professional Development Hours are Available for these Webinar Programs.

The Webinars are on Tuesdays at 12 Noon (Central), space is limited please register today.
